Summary

Highly motivated and result-oriented Full Stack developer with 3+ years of experience in Designing, developing, and implementing robust and scalable applications. Proven ability to translate business requirements into technical solutions, contributing to all phases of the software development lifecycle (SDLC). Passionate about clean code, best practices and continuous learning in the ever-evolving world of technology. Seeking a challenging position to leverage knowledge and abilities in contributing to a dynamic team's success.

Skills

- Programming Languages: Java (SE & EE), JavaScript, Python, SQL, HTML, CSS.
- Framework/Libraries: Spring(Boot, MVC, Data, Security), Spring Boot, Microservices, Hibernate, JPA, RESTful Web Services, Gradle, Mockito, Lombok, Bootstrap, React, Angular, Microservices Architecture.
- DataBase: MongoDB, MySQL, Database Optimization
- Monitoring/Data visualization: Elasticsearch, Splunk, Grafana
- Tools & Technology: Github, Jenkins, GitHub Actions, Docker, Kubernetes, Apache Kafka, OpenLens, Rally, GitHub Copilot, Chat-GPT, Figma, DBeaver, MySql Enterprise, IntelliJ, VS code, Pycharm.
- Testing/code quality: Unit testing (jest, Mocha). Groovy, Junit (Java), SonarQube.
- Other: Design Patterns, Object-Oriented Programming(OOP), Concurrency, Data Structures and Algorithm, Problem-solving, Agile methodology, Communication(written, Verbal), Team Work.

Projects and Achievement:

- Successfully qualified in the Graduate Aptitude Test in Engineering (GATE) in 2020.
- Worked on a portable Device for ECG using raspberry pi 4, which stores the ECG data on Ethereum blockchain. Code uses Solidity and indicates the early signs of heart attack.

Experience (july 2022 – present)

Optum Global Solutions - Full stack web developer

Roles and Responsibilities

- Executed the seamless migration of our customer support portal's frontend from AngularJS to ReactJS, minimizing downtime and improving developer agility for future enhancements
- Led the migration of our backend services from Java Development Kit (JDK) 18 to JDK 21, resulting in improved stability and preparing our systems for future advancements.
- Implemented RESTful APIs for Processing of media files of 100+ different formats related to medical insurance and store it in cloud storage and other storage. Achieved file size support from 100mb to 200mb,
- Wrote unit and integration tests using Junit, Mockito and Groovy to increase code coverage from 70% to 80%.
- Participated in Agile sprint planning, daily Stand-ups and retrospectives.
- Collaborated with cross-functional teams(product managers, clients and QA) to deliver high-quality software solutions.
- Deployed and maintained applications on different environments and servers.
- Resolved production issues and fixed CVE's in the applications, minimising downtime and ensuring application stability.
- Contributed to the improvement of development processes and code standards.
- Created multiple Dashboards using MERN stack to show analytics Data in a well organised way.

Education

M.Tech in Computer Engineering (2020-2022) - Malaviya National Institute of Technology Jaipur, Rajasthan.

Completed with 6.75 CGPA.
